

Perspective — aft, starboard quarter

- Voyis Discovery stereo ×2
73.2° × 73.2°, ~2-4 m, turbidity-limited
- Tritech Gemini 1200ik FLS
120° × 20°, 50 m @1200 kHz
- Water Linked Sonar 3D-15
90° × 40°, 15 m (planned)
- Nortek Nucleus 1000 DVL
3 × 3° @ 25° slant, 0.1-50 m alt.

Pairwise overlap within 2 m

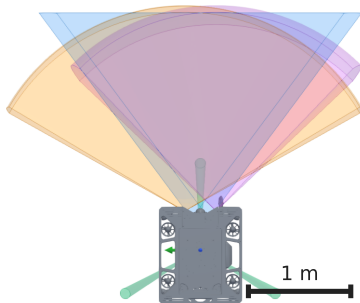

stereo n FLS 1.12 m³ (21/58%)

stereo n 3D sonar 2.22 m³ (41/78%)

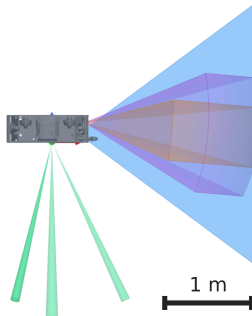

FLS n 3D sonar 1.34 m³ (69/47%)

Volumes stereo 5.4 FLS 1.9 3D sonar 2.9 m³

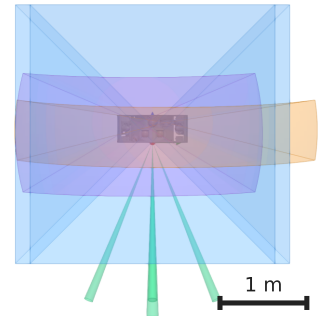

Plan — azimuth

Starboard — elevation

Bow-on — DVL beams

Volumes truncated at 2 m for legibility; true maximum ranges at right. Stereo volume is the two-frustum intersection, i.e. the depth-yielding volume only. Triad at base_link: red = x forward, green = y port, blue = z up.
